Location: 6th of October City, Egypt | Remote (UTC+2)

PROFESSIONAL SUMMARY

Front-end developer and Computer Science student who has already shipped paid client work: a live, multi-page website for a US medical transportation company, taken from first draft to deployment. Builds responsive, accessible sites with JavaScript, React and Next.js. Open to remote freelance projects and internships.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frameworks:** React, Next.js, Tailwind CSS, Bootstrap
- **Front-End:** Responsive Web Design, REST API Integration, Form Validation, CSS Grid, Flexbox
- **Tools:** Git, GitHub, Vercel, GitHub Pages, Figma
- **Currently learning:** Node.js

PROFESSIONAL EXPERIENCE

Freelance Front-End Developer, OZO Transportation (USA, Remote) - 2026

- Built and deployed a multi-page, responsive website for a US non-emergency medical transportation company using HTML, CSS and JavaScript.
- Worked directly with the client from first draft through deployment, revising the design and content over several feedback rounds.
- Now building a ride-request page with client-side form validation.
- Live site | Source code

PROJECTS

Personal Portfolio - Next.js, React, Vercel

- Designed and built a portfolio site with project case studies, a services section and a contact form, deployed on Vercel.
- Live site: mark-ehab.vercel.app

Product Management System (CRUD) - JavaScript, HTML, CSS

- CRUD app with search, sorting, CSV export and live price totals; data persists in localStorage.
- Live site | Source code

Weather App - JavaScript, OpenWeatherMap API, HTML, CSS

- City search returning temperature, humidity and wind speed from a REST API, with a loading state and error handling for unknown cities, API failures and lost connection.
- Live site | Source code

EDUCATION AND CERTIFICATES

B.Sc. in Computer Science - Misr University for Science and Technology (MUST)

6th of October City, Egypt | Expected graduation 2029
Relevant coursework: Data Structures (C++), Discrete Mathematics, Logic Design, Programming Languages

Front-End Development Program (120 hours) - United Arab Innovators Hub
