PROFESSIONAL SUMMARY

Front-end developer and Computer Science student. Build responsive websites with JavaScript and React, and delivered a live client website for a US medical transportation company. Learning Node.js for full-stack work.

TECHNICAL SKILLS

- Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript
- Frameworks: React, Next.js, Tailwind CSS, Bootstrap
- Web: Responsive Web Design, Flexbox, CSS Grid, REST APIs, DOM Manipulation, localStorage
- Tools: Git, GitHub, GitHub Pages, Vercel, npm, Figma, VS Code
- Learning: Node.js, Back-End Development

PROFESSIONAL EXPERIENCE

Front-End Developer (Freelance), Medical Transportation Company (USA) - 2026

- Built and deployed a multi-page, responsive website for a US non-emergency medical transportation company using HTML, CSS and JavaScript.
- Worked directly with the client through feedback rounds; currently building a ride-request page with form validation.

PROJECTS

Weather App - JavaScript, OpenWeatherMap API, HTML, CSS

- City search returning temperature, humidity, wind speed and country from a REST API, with loading state and error handling for unknown cities, API errors and lost connection.
- markehab1.github.io/Weather-App | github.com/Markehab1/Weather-App

Product Management System (CRUD) - HTML, CSS, JavaScript

- Full CRUD interface with search, automatic price total calculation and localStorage persistence.
- markehab1.github.io/Product-management-system-CRUDS- | github.com/Markehab1/Product-management-system-CRUDS-

To-Do List - HTML, CSS, JavaScript

- Add, edit, complete and delete tasks with keyboard shortcuts, filter tabs and localStorage persistence.
